SOLAR FARM MANAGEMENT

Wind and solar – with us you get everything from a single source

We, the wpd windmanager GmbH & Co. KG from Bremen, are market leaders in the technical and commercial management of wind and solar farms. Driven by the vision of establishing renewable energies, we have been on the market since 1998.

From that time on, we have developed into one of the most successful players in the sector. Today, more than 420 employees work for us, both at our locations in Germany and worldwide.

More than 5.6 gigawatts under management”

Our capacity in operational management comprises more than 5.6 gigawatts of power and our portfolio of wind energy and solar plants is growing continuously.

With our comprehensive range of technical and commercial services, we guarantee optimum operation of your plants. Our Solar Competence Center in Erkelenz has more than 20 years of experience in photovoltaics.

Every day, our experts deal with all the questions concerning your investment. The expertise of our employees enables us to constantly develop new solutions and to react immediately to changes in the market.

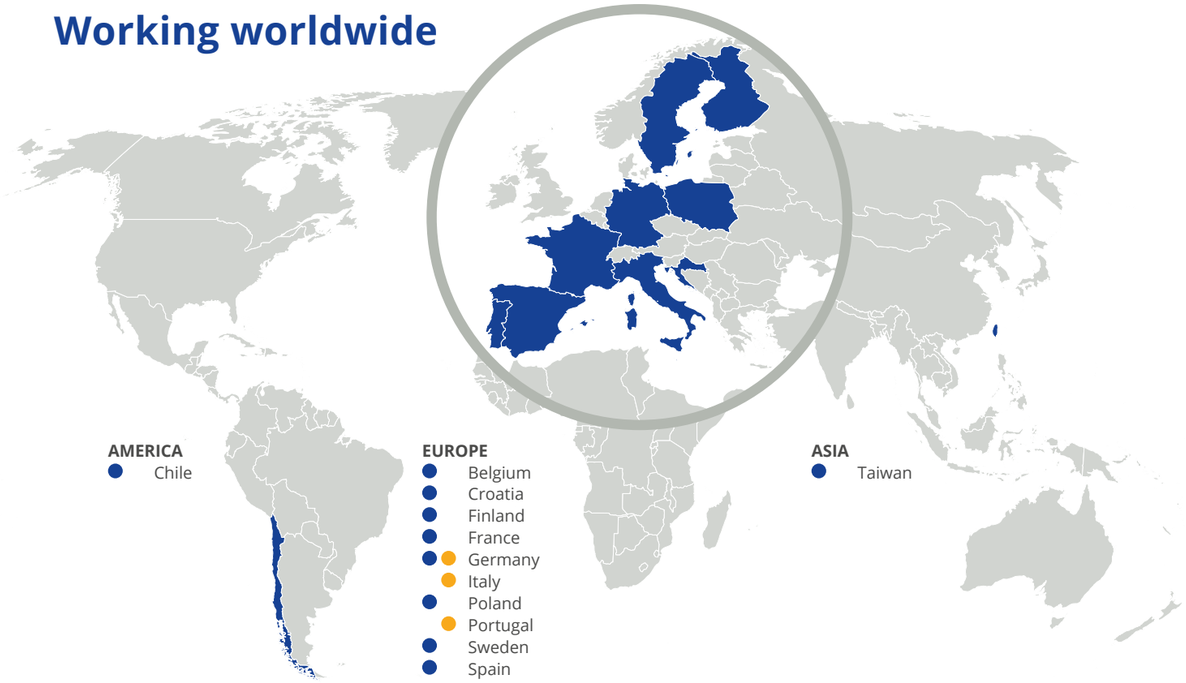
Wind and solar farm management

In solar farm management, we – and so of course you – benefit from our synergies with wind energy.

We are also happy to manage your entire renewable energy portfolio of wind and solar farms.

Our Solar Competence Center in Erkelenz offering management and service

Working worldwide



for renewable energies

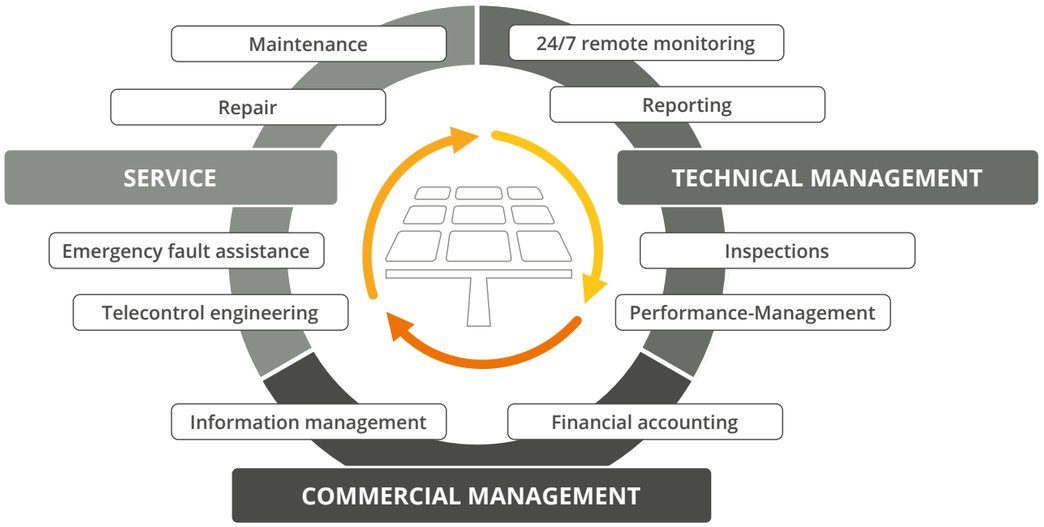
SOLAR FARM MANAGEMENT



Our services

Know what matters to you at all times

Would you like the operation of your photovoltaic plants to pay off in full – without having to take care of the commercial management yourself?

Our experts support you in all the commercial questions concerning your investment. And we do this with a wealth of experience gained over many years from the worldwide operation of more than 2,500 plants.

In addition to accounting, our services include the entire contract management and controlling. Furthermore we monitor profitability, thereby creating the framework conditions for optimum liquidity. Another plus point – our detailed reporting.

More than 2,500 plants under management

We report transparently on all relevant information and thus provide you with an important basis for decision-making.

Our employees have many years of expertise, negotiate the optimum contract conditions for you, and thus ensure the best possible processing. The close cooperation with our technical management minimizes friction losses and guarantees the optimum operation of your investment.

COMMERCIAL MANAGEMENT

- **Contract management**
- **Controlling**
- **Optimization of liquidity / payment transactions**
- **Information management**
  – Comprehensive investor support
  – Transparent reporting
- **Insurance concepts**
- **Direct marketing of electricity**
- **Financial accounting**

Always with the focus on your plants

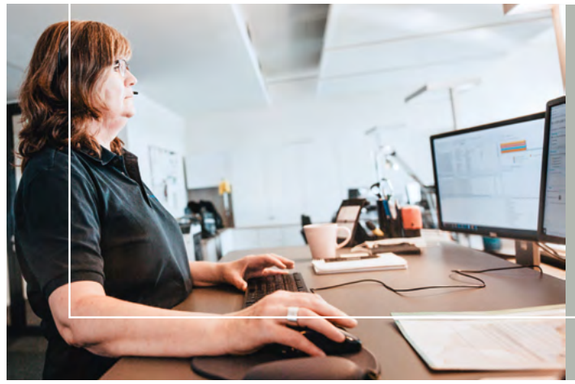
Anyone who operates a photovoltaic plant needs to check it continuously. Is the performance still good? Or can the returns be optimized? Are there any unidentified faults? And if yes, how can these be remedied as quickly as possible?

Our technical operations management looks after you in all matters relating to your solar farm – from the modules to the inverters up to the feed-in point.

We take care of all organisational issues – from 24-hour remote monitoring to scheduled maintenance and unscheduled troubleshooting.

With our numerous locations and partners, we are quickly on site and minimize downtimes.

Thanks to our expertise, we optimize the operation of your solar farms, thereby protecting you from yield losses. In addition, we offer performance measurements and expert opinions, for example, as a basis for a sale.



TECHNICAL MANAGEMENT

- 24/7 remote monitoring
- Data acquisition and evaluation
- Reporting
- Inspections
- Performance management
- Adjustments to legal requirements
- Organization of dismantling or continued operation

Everything always under control for you

Our service is as flexible as the wishes and needs of our customers are variable. We offer you fully customised services, which are perfectly tailored to your solar plant – from scheduled servicing to emergency fault assistance to a long-term maintenance strategy.

All our services are designed to exploit the full potential of your plant.

Over 20 years of experience in maintenance

And this experience applies to ground-mounted systems, as well as to tracker- and roof-mounted systems. Our trained technicians are authorised for medium voltage circuits.

MAINTENANCE AND SERVICING

- Scheduled maintenance / repair
- Emergency fault assistance
- Individual maintenance strategy
- Spare parts management with complete logistics
- Thermography
- Power curve measurement
- Service for inverters and transformers
